

# 5-000 -A/C Site Summary- Typical LA-LB Sandy Beach

5-000 -A/C

Thomas Guide Location

Latitude N

Longitude W

County: Los Angeles Co./Orange Co.

USGS Quad:

NOAA Chart: 18740

Last Page Update : 11/12/2003

## SITE DESCRIPTION:

Beaches with various sizes of sand grains. Can be feeding area for Snowy Plover. Be on the watch for fenced nesting areas for Least Terns.

## SEASONAL and SPECIAL RESOURCE CONCERN

Rank A - C: Various.

## RESOURCES OF PRIMARY CONCERN

Sandy shoreline.

California Brown Pelican (Federal and State endangered species), seabirds, and shorebirds.

Intertidal fish, including Grunion, and invertebrates.

## CULTURAL, HISTORIC, and ARCHEOLOGICAL SENSITIVITIES

### KEY CONTACTS: Trustee (T); Entry/Owner/Access (E); Cultural (C); or Other Assistance (O)

Latitude N Longitude W

### CONCERNS and ADVICE to RESPONDERS:

To protect endangered and sensitive species. Prevent oil from washing onto shoreline.

### HAZARDS and RESTRICTIONS:

Watch weather and sea conditions. Strong surf.

Last Page Update : 11/12/2003

### SITE STRATEGIES

**Strategy 5-000.1** **Objective: Open water containment and recovery to prevent oil from reaching the shoreline.**

ACP DATE

Use towed boom arrays with OSRO vessels and vessels of opportunity (each boom 660' to 750') as necessary.

### Table of Response Resources

strategy number	harbor boom	swamp boom	Other boom type	sorb boom	Anchoring no type and gear	Boom boat	Skiffs punts	Skimmers No Type	Special Equipment No and kinds	staff deploy	Staff tend
5-000.1			1500 Ocea		0	4	0	0		8	

### LOGISTICS

**DIRECTIONS:** to site (by land and/or by water, to nearest launch ramp and are access permits required.)

Most Access from Pacific Coast Highway (PCH or Highway 1).

### LAND ACCESS:

### WATER LOGISTICS:

Limitations: depth, obstructions:

Launching, Loading, Docking

and Services Available:

**FACILITIES, STAGING AREAS, POSSIBLE FIELD POSTS AND EQUIPMENT AVAILABLE:**

**COMMUNICATIONS PROBLEMS:** None.

### ADDITIONAL OPERATIONAL COMMENTS:

Beaches must be precleaned. Watch for fenced Least Tern sites.

There is NO Strategy

**ADDITIONAL SITE SUMMARY COMMENTS:**

## 5-010 -A Site Strategy - Malibu Lagoon Coastal Wetland

County and Thomas Guide Location  
629 A7 Los Angeles Co.

NOAA CHART  
18744

## 5-010 -A

Latitude N Longitude W  
34 02.0 118 41.0

Last Page Update : 11/12/2003

### CONCERNS and ADVICE to RESPONDERS:

To protect endangered and sensitive species and wetland habitat. Responders should watch for and avoid nesting birds and minimize disturbances to vegetation. Avoid the spread of oil into the wetland through response activities.

### HAZARDS and RESTRICTIONS:

Microbiological hazard from contaminated water.

### SITE STRATEGIES

#### Strategy 5-010.1 Objective: Exclusion of oil entry to wetland.

ACP DATE

A complete closing off of the Malibu Creek Inlet by means of intertidal boom.

#### Strategy 5-010.2 Objective: Exclusion of oil entry to wetland.

ACP DATE

Deflection boom or booms in cascade pattern to move oil to a collection point for a skimmer. Sorbent booms can be placed on the shoreline to help in clean-up. If oil does reach the shorelines then mechanical or manual removal or cleaning of impacted area may become necessary.

#### Strategy 5-010.3 Objective: Exclusion of oil entry to wetland.

ACP DATE

Construction of a filter barrier (excellent fence) if there is a shortage of sand to protect from high tides or waves.

### Table of Response Resources

strategy number	harbor boom	swamp boom	Other boom type	sorb boom	Anchoring no type and gear	Boom boat	Skiffs punts	Skimmers No Type	Special Equipment No and kinds	staff deploy	Staff tend
5-010.1			500 Intert	500	0		2		0		4
5-010.2	1200			1200	0	0	0	0			8
5-010.3			2000 Pom		0	0	0	0			10

### LOGISTICS

**DIRECTIONS: to site (by land and/or by water, to nearest launch ramp and are access permits required.)**

From PCH in Malibu, go south on Cross Creek Rd. until you reach the State Park parking lot.

**LAND ACCESS:** Access from PCH, Malibu Colony Road, and State Beach parking lot.

**WATER LOGISTICS:** Shallow water and heavy vegetation.

Limitations: depth, obstructions:

Launching, Loading, Docking and Services Available: No boat ramps. Launch punts from sandbar at mouth of the lagoon.

### FACILITIES, STAGING AREAS, POSSIBLE FIELD POSTS AND EQUIPMENT AVAILABLE:

Parking and staging in State Park parking lot. There is street and off-street parking along PCH near Surfrider County Beach.

**COMMUNICATIONS PROBLEMS:** None.

**ADDITIONAL OPERATIONAL COMMENTS:**

Longitude W  
118 28.0

Last Page Update : 11/12/2003
-------------------------------

**SITE DESCRIPTION:**

Feeding site at fore beach; fenced nesting site on upper portion of beach north of Ballona Creek entrance (Marina Del Rey). Medium grain sand beach. Grunion spawning at high tide - usually at ends of beach.

**SEASONAL and SPECIAL RESOURCE CONCERN**

Rank A: April to September.

Western Snowy Plovers and California Least Terns both nest above the high tide line. Western Snowy Plover chicks move to wave wash zone after hatching. California Least Terns forage in offshore waters.

Other concerns: Grunion runs - late February to early September - Grunion lay eggs in sand at highest tide line. Eggs are very vulnerable to oil and beach clean-up.

**RESOURCES OF PRIMARY CONCERN**

Nesting and feeding site.

California Least Tern (Federal and State endangered species) and Western Snowy Plover (Federal endangered species).

Intertidal fish, including Grunion, and invertebrates.

**CULTURAL, HISTORIC, and ARCHEOLOGICAL SENSITIVITIES****KEY CONTACTS: Trustee (T); Entry/Owner/Access (E); Cultural (C); or Other Assistance (O)**
